

## GARMENT CHECK SYSTEMS

### Garment Check Rack Specifications

Garment Check Racks are constructed entirely of 304 stainless steel. Each component piece TIG welded together. The complete rack is easily assembled on site with the provided slip joint connectors and stainless steel hardware. Custom labels are provided for each bag location. Specify any numbering pattern from 1 to 999. A unique hook design holds both the garment bag and ID pin. Casters are optional on Floor models.

Item Number	GCS-7436-30	GCS-7464-45	GCS-7472-60	GCS-7492-90
Type	Wall	Wall	Floor	Floor
Bag Capacity	30	45	60	90
Width (in.)	76.5	76.5	76.5	76.5
Height (in.)	36	64	72	92
Depth (in.)	12.5	12.5	25.25	44
Weight - unloaded (lbs.)	34	41	66	98

### Garment Check Bag Specifications

Garment Check Bags are constructed of a unique vinyl coated, polyester mesh. The edges and stress points are reinforced with polypro webbing. Each bag features a large pocket, medium pocket and two shoe pockets. A shirt or coat can be placed over the entire bag to prevent wrinkling. A hardwood dowel is used to provide rigidity along the bags top edge. The hooks are formed from mild steel and then nickel plated to resist corrosion. They are then attached to the dowel to permit 360° swivel. An optional nickel-plated trouser bar is also available.

Item Number	GCS-1821-SD	GCS-1821-TB
Width (in.)	18	18
Height (in.)	21	21
Options	N/A	Trouser Bar
