Pressure Sensitive Pool Signs

SIGN COMPOSITION:

Our Series 1000 pool signs consist of a highly durable specially formulated blend of Polymer resins, coated with a unique pressure sensitive adhesive designed to adhere firmly to sealed or painted concrete surfaces.

COLOR:

Black

APPLICATION PROCEDURE:

1. Clean sign area completely free of loose particles. Allow to dry before applying sign. Sign should be painted or sealed for best results.
2. Carefully pull off backing paper with sign face lying on a flat, dry surface.
IMPORTANT! Series 1000 adhesive is very adhesive, so we recommend that you spray the adhesive side with a little water to insure easy handling and proper positioning.
3. Apply sign and press down firmly to squeeze out water. (A rubber mallet works very well.) Allow 2 hours drying time.
