PACE CLOCKS

VISIBLE, ACCURATE, PORTABLE TIMING TOOLS

Competitor Pace Clocks offer a unique face design with highly visible graphics and larger numbers at critical intervals for ease of use. This visibility is critical when performing training sets and for assessing improvement.

Our pace clocks are made from durable materials to resist the impact of pool chemicals and weather. They feature sweep-minute and second hands that are easy to see and designed to resist warping. Faces and hands are protected from damage and splashing by a clear Plexiglas® lens. We offer two clock sizes and two face-color options, including the new yellow on black.

Contact your local distributor to place an order. Or, call Competitor at 800-888-7946 and we'll help you locate your local dealer.

31-INCH CLOCKS ELECTRIC OR BATTERY POWERED

Our 31-inch pace clocks are designed primarily for competitive swim training and are available in electric and battery options. They may be wall-mounted or secured to a roll-away stand (*sold separately*). 31-inch clock housings offered only in white. Electric option includes an 18-foot electrical cord, with on/off switch. Battery option includes a "C" Battery.
