

Installation Instructions for Pace Clock Motors

ELECTRIC MOTOR (#200316)

1. Position Electric Motor inside the clock so all holes are aligned.
2. Insert the (4) four nylon screws.
3. Screw in the (4) four nylon nuts.
4. Motor should now be securely in place.
5. On the clock face, screw on the small knurled nut when you attach the black minute hand.

BATTERY MOTOR (#200306)

1. Place fiber washer on shaft of Battery Motor.
2. Position Battery Motor inside the clock.
3. Hold motor in place while attaching remaining hardware on the face of the clock.
4. On the shaft, in the following order, place the large brass washer, small brass washer and large knurled nut.
5. The small knurled nut is then placed on to secure the black minute hand.
