

Racing Lane Modification Instructions

TO LENGTHEN THE OVERALL LENGTH OF THE LANE FROM 75' (25YD) TO 25M (82') BY ADDING A 7' DISCONNECT

1. Lay Competitor® Racing lane on a flat surface or pool deck.
2. Release all slack on the Take Up Reel, so Blue Nylon spool is showing.
3. Locate the mid-point of your current lane and place a piece of electrical tape on the cable.
4. Using bolt cutters, cut the cable at the point where the electrical tape is.
5. Place Bronze Clevis on each loose end.
6. Start with the side with no set screws and loop back through the set screw side.
7. Tighten set screws with Allen wrench to complete modification.
8. By using the 7' Disconnect you now can use your lane for 82' or 75' lengths.
