## MINIMUM WEIGHT - MAXIMUM STRENGTH

Resin Transfer Molding (RTM) is an advanced manufacturing process that is used in a diverse range of applications from aerospace to automotive products. The RTM process creates a composite material that has a high strength to weight ratio - although lightweight, it is exceptionally strong and durable. RTM products offer a truly unique look that is salt pool friendly and UV resistant to protect colors from fading.

## POOL LOUNGER DIMENSIONS

Weight of empty lounger = 25 lbs  
 Weight of lounger in water:  
 6" Depth = 53.7 lbs  
 9" Depth = 64.3 lbs  
 12" Depth = 71 lbs
