

## TRIAD ATHLETIC BENCH

**NOTE:**

Do not remove foam blocks on the underside of the Bench.  
They are to prevent wedging when Benches are stacked.

### **Proper Method of Moving and Stacking**

To avoid personal injury and scuffing of the tops and sides of the Triad Athletic Bench it is recommended that the following transporting and stacking procedure be used.

- 2 people at each end of the bench to lift, stack and transport using the hand holes provided.
- Do not stack more than 6 benches high.

To keep your TRIAD ATHLETIC BENCH in good condition avoid the following:

- The handling of the bench by one person.
- Stack the benches evenly to avoid wedging.

Periodically, you may wish to clean or mechanically buff the finish to restore the shine and color. We recommend using these products.

### **Cleaners**

Formula 409 All Purpose Cleaner or Clorox Soft-Scrub. Follow manufacturer's instructions.

### **Buffing compound**

Super Duty Rubbing Compound (3M™#05954)

Buffing Pad (3M™#05705 )

7" variable speed polisher
