WORLDSTONE COVER (automatic surface mounted units only)
Use a cast iron model number with the suffixes listed below, Example: XA5-668
674 - White, 668 - Beige, 662 - Ebony, 655 - Granite Grey

PUSH BUTTON MODELS,
Remove the "X" from the model number, For example: A5-974
(push button not available in stainless steel recessed units)

* Available Fall 2008
Not available in push button

MODEL NUMBERS For specification purposes, a model with a "5" in the model number (indicating a fixed nozzle) is the same as a model without the 5 (indicating a swivel nozzle). All Model A dryers now come only with fixed Universal nozzles that can be easily adjusted during installation (or thereafter) to be a swivel nozzle. Example: an A-974 is the same for specification purposes as an A5-974. The unit can only be purchased as an A5-974. Read the notes under the chart for more ordering information.

PLANNING GUIDE

QUANTITY ESTIMATE
Average traffic: 1 dryer per 2 washbasins
Heavy traffic: 1 dryer per washbasin
54" Bradley sink: 4 dryers per sink

ADA COMPLIANCE ♿
Recessed dryers come standard with "Q" nozzle to comply with ADA 4" protrusion requirements.

INSTALLATION
Hand dryers require a dedicated 20 AMP circuit, and must be properly grounded. GFI Circuit protection is recommended. One side of dryer should be mounted to a stud.

DRYER PLACEMENT
Hand dryers should be placed at least 2 feet apart, near but not over the washbasin. In congested areas dryers should be placed to create a traffic flow from wash basin to dryer to exit. Automatic dryers should be placed more than 18" above or away from projections, which may interfere with the operation of the automatic sensor.

COVER MATERIALS

CAST IRON COVERS provide the ultimate in durability and vandal-resistance. The 1/4" thick cast iron with porcelain enamel construction makes this option suitable for areas such as train and bus stations, schools, theaters, airports, and prisons.

STEEL COVERS are an excellent alternative. They are both durable and economical. Grade 304 stainless steel covers are vandal resistant and offer a touch of elegance.

WORLDSTONE COVERS provide a durable, cost effective option to traditional metal covers. Available for Model A, surface mounted, automatic hand dryers. Embedded with antimicrobial agents to promote hygiene. Material originally developed for use in high temperature, demanding aerospace and automotive applications.
